SUMMARY

Computer Science and Engineering graduate focused on frontend development and responsive web interfaces. Hands-on experience building interactive websites using HTML5, CSS3, JavaScript, React.js, Tailwind CSS, and GSAP. Familiar with REST API integration, Git/GitHub, responsive design, and frontend debugging. Seeking an entry-level Frontend Developer role to build modern and user-friendly web experiences.

EDUCATION

Sharad Institute of Technology, College of Engineering

2022 – 2026

B.Tech. in Computer Science and Engineering

Ichalkaranji, Maharashtra

Maharashtra High School & Junior College

2020 – 2022

Higher Secondary Certificate (HSC)

Kolhapur, Maharashtra

S.M. Lohia High School

2019 – 2020

Secondary School Certificate (SSC)

Kolhapur, Maharashtra

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, GSAP, ScrollTrigger

Web Development: Responsive Design, DOM Manipulation, REST API Integration, JSON, UI Animations

Programming: JavaScript, Java

Tools: Git, GitHub, VS Code, Postman, Figma, Vercel

Backend Familiarity: Node.js, Express.js, MongoDB

PROJECTS

Premier Models | *HTML5, CSS3, JavaScript, GSAP, ScrollTrigger*

[Live Demo](#)

- Built a responsive fashion/model management landing page with a video hero section, model carousel, updates, blog cards, animated marquee, and structured footer.
- Implemented interactive entrance, reveal, and scroll-based animations using GSAP and ScrollTrigger, including staggered section animations and a pinned image reveal with scrub control.
- Developed responsive desktop, tablet, and mobile layouts with CSS media queries and added an animated hamburger menu with staggered navigation links.

BoardBridge – IoT Hardware Marketplace | *React.js, JavaScript, Node.js, Express.js, MongoDB*

- Developed a full-stack marketplace interface for buying and selling used IoT hardware including development boards, sensors, cables, displays, and power modules.
- Built reusable React components and integrated frontend with REST APIs for product and user operations, with MongoDB used for persistent data storage.
- Implemented authentication-related flows and seller-side functionality while testing API requests and frontend-backend communication using Postman/Thunder Client.

TEA – Scroll-Driven Luxury Website | *JavaScript, HTML5, CSS3, Express.js, Vercel*

[Live Demo](#)

- Created a cinematic scroll-driven website using a 227-frame image sequence synchronized with page scrolling to produce frame-based animation effects.
- Implemented responsive layouts, interactive sections, transitions, and optimized image loading/rendering for a smoother scrolling experience.
- Deployed the project on Vercel and structured the application using frontend assets with JavaScript-based scroll interactions.
